

Northern Arctic Federal University named after M.V. Lomonosov (NArFU)

Northern Arctic Federal University named after M.V. Lomonosov, located in Arkhangelsk, is one of the largest research and educational centers in Russia.

Being one of Russia's 10 federal universities, NArFU fosters innovation and trains specialists for the Arctic and High North resource development. NArFU is the only Russian university being tasked with training experts of international level in areas such as engineering, technology, IT, humanities and life sciences with a special focus on the Arctic region. The University creates conditions necessary to support the industrial projects being launched in the polar region with personnel and technologies.

NArFU is a classical university offering a wide range of educational programmes in natural and applied sciences, mathematics and IT, economics and management as well as social sciences and humanities. NArFU annually introduces new programmes including English-taught degree programs and non-degree courses.

NArFU's research infrastructure encompasses 20 science and innovation centers, 25 laboratories, and a research library with a collection of 960,000 books.

Since 2012 NArFU organizes the marine research and education project "Arctic Floating University", which aims to preserve the Arctic environment and to ensure the sustainable development of the region.

NArFU is an international university with partnership relations with more than 160 universities and businesses all over the world. University's projects, annually funded by grants from Russian and international foundations, cover a broad range of fields, from environmental conservation to the preservation of cultural heritage sites and IT.
